Southern Expansion Update

Two months have gone by since our last Southern Expansion update, and what a difference a few weeks make. Construction is 96% complete and the stations' major amenities – parking lots, canopies, benches, water fountains and foliage, have been almost completely installed. Major work continues along the corridor on items such as signal drainage and system integration. Preparation for inspections and testing is also underway. In fact, you may see SunRail trains up and down the Southern Expansion portion of track during this phase.

A major emphasis is being placed on safety along the 17.2 miles of the new commuter rail corridor, which is scheduled to open in mid 2018. Bombardier, the operations and maintenance contractor, is meeting with first responders to provide equipment familiarization and safety training. FDOT is also installing 400 new No Trespassing signs from Debarry to Poinciana.

Our Marketing team is currently planning train tours at all four new stations, in May and June. Dates and times will be released in an upcoming issue of *On Track*. We hope you will join us for these community events.

Our Business Development team has been in the community presenting Southern Expansion updates to groups, businesses, civic leaders and the public. If you would like to schedule a presentation, please contact: caroline@evolvewithtoday.com.
